## PROFILE

I'm an enthusiastic and creative individual with a proven track record in social media content creation and video editing. I bring strong communication and collaboration skills to the table, adept at building positive relationships with colleagues and clients. Furthermore, I possess a strong technical skillset

I am passionate about giving back to the community. Since 2021, I have volunteered with the Fire Cadets, where I have led fire safety education for two year groups. Through this experience, I fostered a deeper understanding of fire science and practical firefighting skills among young people and gained experience working as a leader. Additionally, I volunteer at the Blackpool Music School "Warm Hub," an initiative providing essential services to vulnerable populations. Here, I contribute by offering warm meals, drinks (using their professional barista machine), and entertainment to the elderly, mentally impaired, and homeless communities.

Since working at Taco Bell, I earned valuable skills in customer care and food safety. I had to make sure that meat was up to temperature before being served and that customers were taken care of, whether they wanted to place an order at the till or ask a question about a product.
